What's New In CMUD?

Allows you to connect to and play hundreds of MUD Games on the Internet, and provides you many useful tools, such as aliases, actions, macros, keys, buttons, scripts, maps, databases, etc, to make your MUD player's life easier and more profitable. Take

note that this is a second-generation MUD client created by the authors of zMUD (Zugg's MUD Client). While it is mostly compatible with the app, the difference is that it has been redesigned for improved stability and expandability. The program addresses both the novice MUD player, as well as the advanced player. For novice players, the built-in list of all MUD games on the Internet makes it easy to get started. If you are a novice user, don't be intimidated by the large number of commands and features in CMUD. These features will not get in your way, but they will be waiting for you when you become more advanced. It goes without saying that for advanced users, the app can be completely customized and scripted. You can create "robot" programs that respond to conditions on the MUD, whereas the scripting can even be used to interact with other programs on your computer. In fact, as a scriptable Telnet client, the utility can be used to automatically monitor a network, control routers, and more
